

Apple II Business Graphics Apple /// Business Graphics

Apple Business Graphics allows you to transform numerical data such as sales figures, stock activities, or budget information into a wide variety of easy-to-understand charts and graphs. Based on a simple command language, the program will help you create line, bar and pie charts that give greater impact to reports and proposals. Apple Business Graphics:

- extends your resources, letting you use data files from many sources including DIF, VisiCalc®, BASIC, and Pascal
- allows you to plot two or more graphs on the same set of axes
- permits curve-fitting and trend-line analysis including mathematical and statistical functions
- gives you complete control of all graph parameters
- aids data analysis by letting you enlarge any area of a graph and study it closely
